

Kids Church & Quisat Moments

What is live in Quisat, and how to test it.

Prepared for

Church / children's ministry client

Prepared by

Quisat Innovations Limited

Date

11 September 2026

Web admin

Parent app

Staff app

This release turns Quisat into a children's ministry workspace, organised the same way as Kids Clinics: **one Kids Church menu** on the web, with clear tabs instead of scattered school links. Parents and teachers use the Quisat app for check-in, pickup, photos, prayer, and this week's lesson.

1. What we have delivered

Web — Kids Church dashboard

Staff sign in at the Quisat admin portal. Churches see a single **Kids Church** item in the sidebar (next to Kids Clinics). It opens a dashboard with stats and tabs:

Tab	What it is for
Overview	Sunday workflow, live counts, today's birthdays, medical alerts, active lesson
Children	Register children, assign groups, store allergies and medical notes
Groups	Age groups / classes (Nursery, Kids, Teens)
Check-in	Today's pickup codes and attendance. Checkout needs the code from check-in
Lessons	Weekly Bible lesson, crafts, teaching script, family challenge, pastor devotion, home resources
Incidents	Physical, behavioural, or health reports. Parent is notified in the app
Volunteers	Roster, role, background-check status, hours served
Moments	Private class / event photo albums
Prayer	Prayer box: Received → Being prayed for → Answered, plus praise report

Memory Wall	This week's verse and prayer focus (shown on the parent home screen)
Events	Church calendar, camps, family days (parents can browse and pay where priced)
Parents	Link families with a Quisat code so they can check in and see Moments
Fees / Giving	Child fees and giving. Parents pay from Fees in the app

Parent app

- Home shows this week's verse, prayer focus, this week's lesson, pastor's devotion, and today's pickup QR
- Check-in / pickup codes for Sunday drop-off
- Quisat Moments — view, like, comment (comments visible to teachers only), download HD
- Prayer box — submit a request (optional anonymous)
- Lessons & faith — recap, memory verse, family challenge, home resources
- Care reports — incident updates from staff
- Events and Fees as before
- Birthday push with a blessing verse (sent automatically at 07:00)

Staff / teacher app

- Kids check-in and checkout (checkout requires the 4-digit pickup code)
- Medical / allergy alerts on the child's card at check-in
- Create Moments albums (daily, event, or official class photo), tag children, publish to that group's parents
- Publish lessons and devotionals
- Log care / incident reports (parent is notified immediately)
- Update prayer request status and add a praise report

2. Feature checklist (against the agreed scope)

Requested	Status	Where to find it
Children's ministry dashboard	Done	Web → Kids Church
Groups / classes by age	Done	Kids Church → Groups
Digital check-in / check-out	Done	Web Check-in tab + app Check-in
Secure pickup codes to parent phone	Done	4-digit code + QR in app; push notification after check-in

Allergy & medical alerts	Done	Child profile; shown at check-in
Weekly Bible lessons, crafts, scripts	Done	Kids Church → Lessons; parent Lessons screen
Resources for home & pastor devotion	Done	Lessons types: Home / Devotion
Memory Wall (verse + prayer focus)	Done	Memory Wall tab; parent home
Prayer request box (3 stages + praise)	Done	Prayer tab + app Prayer box
Volunteer roster, background check, hours	Done	Kids Church → Volunteers; reminders via Chat
Incident / health report + parent notify	Done	Incidents tab + app Care reports
Birthday messages + blessing verse	Done	Automatic daily at 07:00
Events, RSVP, payments / giving	Done	Events + Fees / Giving; parent Events & Fees
Announcements / push notifications	Done	Existing broadcast + new lesson / pickup / incident / Moments pushes
Quisat Moments (private class albums)	Done	Moments tab + app Moments
Like, comment (teacher-only), tag child	Done	Album in the app
Physical QR door scanner / SMS barcode	Not this release	Code + QR are in the app; no hardware scanner or SMS gateway
Paid HD albums / print on mug or T-shirt	Not this release	Parents can save HD from the album; print shop is a later product

Out of this release (by design): a physical door QR scanner, SMS barcodes, and a photo print shop. Pickup still works with the 4-digit code, on-screen QR, and a push to the parent.

3. Before you test — enable the church

1. Sign in to the Quisat admin as a super admin.
2. Open the church business and enable the features **Kids Church** and **Quisat Moments**.

3. On the live server, also run the latest database update (your technical contact will run `php artisan migrate`).
4. Staff and parents need the **latest Quisat app build** for Lessons, Care reports, Moments tagging, and pickup QR.

Web address: <https://app.quisat.com>

Kids Church page: after login, sidebar → **Kids Church** (or go to `/kids-church`).

4. How to test — church staff on the web

A. Dashboard

1. Log in as church staff. Confirm the sidebar shows **Kids Church** (school-only items such as Terms and Exams should be hidden for a church-only tenant).
2. Open Kids Church. Confirm the hero stats (children, groups, checked in today, open pickup codes).
3. Open the Overview tab. Confirm birthdays, medical alerts, and active lesson if data exists.

B. Groups and children

1. Tab **Groups** → add Nursery / Kids / Teens.
2. Tab **Children** → Add child, assign a group, fill Allergies and Medical notes.
3. Tab **Parents** → Add parent, or **Link by Quisat code** using the code from the parent's Profile in the app.
4. Confirm Cancel / Save on a child form returns you to Kids Church, not a school students page.

C. Sunday check-in

1. On the app (staff or parent), check a child in.
2. On the web, open **Check-in**. Confirm today's pickup code appears and attendance is Present.
3. On the app, try checkout *without* the code — it should fail. Enter the correct 4-digit code — the child is released.

D. Lessons, prayer, memory wall

1. **Lessons** → add a Weekly Bible lesson with object lesson, crafts, memory verse, and family challenge. Set status to Published.
2. Add a Pastor devotion and a Home resource.
3. **Memory Wall** → add this week's verse and a prayer focus.
4. **Prayer** → after a parent submits a request, change status to Being prayed for, then Answered, and add a praise report.

E. Incidents, volunteers, giving

1. **Incidents** → log a health or behavioural note. Confirm the parent gets an in-app notification.
2. **Volunteers** → add a teacher/helper, set background check to Cleared, enter hours.

3. **Fees / Giving** → create a fee. Confirm it appears under Fees in the parent app.

F. Quisat Moments (web)

1. Tab **Moments** → Create album, choose Daily / Event / Official class photo, pick a group, upload photos, publish.
2. Only parents of that group should see the album in the app.

5. How to test — parent app

1. Log in as a parent linked to the church (or link with the Quisat code).
2. Home should show verse, prayer focus, this week's lesson, and (after check-in) today's pickup QR and 4-digit code.
3. Open **Check-in** → check the child in. Confirm a pickup code appears and a notification arrives.
4. Show the code (or QR) at pickup. Staff must enter that code to release the child.
5. Open **Moments** → open the album → like, leave a comment for the teacher, Download HD. Confirm the privacy note (do not post outside Quisat).
6. Open **Prayer box** → send a request (try anonymous as well).
7. Open **Lessons** → confirm the published lesson, home resource, and devotion.
8. If staff logged an incident, open **Care reports** and confirm the update.
9. Open **Events** and **Fees** as usual.

6. How to test — teacher / staff app

1. Log in as church staff.
2. Open **Kids Check-in**. Confirm allergy / medical alerts on children who have notes.
3. Check a child in. Confirm the pickup code. Check them out only after entering that code.
4. Open **Moments** → New album → select group, album type, tag children, add photos, Publish. Confirm parents of that group get a push ("New Photos..." / "Your child was tagged").
5. Open **Lessons** → publish this Sunday's material. Confirm parents are notified.
6. Open **Care reports** → log an incident. Confirm the parent is notified.
7. Open **Prayer box** → mark Praying, then Answered, and type a praise report.

7. Suggested demo script (10 minutes)

1. Web: walk the Kids Church dashboard tabs (30 seconds each).
2. Add a child with a peanut allergy → staff app check-in → show the medical warning.
3. Parent app: show the pickup QR → staff checkout with the wrong code (fail) then the right code (success).
4. Publish a lesson on the web → open it on the parent home.

5. Upload a Moments album for Nursery → open it on a Nursery parent phone (and confirm a Teens parent cannot see it).
6. Parent sends a prayer → staff marks Answered with a praise report.

8. Support notes

- A tenant that is both a school and a church keeps school menus *and* Kids Church.
- A church-only tenant should only see Kids Church (plus shared tools such as Chat, Staff, and Financials).
- Pickup codes expire at the end of the day and can only be used once at checkout.
- Moments albums are private to the group. They are not posted to Facebook or WhatsApp from Quisat.
