

Quisat package plans

Developer instructions and parent / staff mockups

Gold • Silver • Free | Schools and churches | 9 October 2026

Implement organisation-level packages that control the Quisat community services available to linked parents and staff. Keep the organisation's existing operational features and data intact when its package changes.

Package comparison

Feature / access	Gold	Silver	Free
Linked school or church operations	Available	Available	Available
Clinics	Available	Available	Available
Kid's Mart & Stationery	Hidden	Admin choice	Available
Kids Events & Places	Hidden	Admin choice	Available
Parent Corner	Hidden	Admin choice	Available
Christian Kids Hub	Hidden	Admin choice	Available
Quisat Adverts	Hidden	Admin choice	Available
Support a Child	Hidden	Admin choice	Available
Organisation price	To be provided	To be provided	No charge

Silver mockups illustrate Clinics, Parent Corner and Kids Events & Places. This is an example configuration; the administrator can choose a different set of community services.

Implementation requirements

Administration and access

- Allow the Quisat administrator to assign Gold, Silver or Free separately to each school or church.
- For Silver, provide individual on/off controls for each community service listed in the comparison. Clinics stays available.
- Apply the selected organisation's settings to both parent and staff views. When a user switches organisations, load that organisation's package and permissions.
- Hide disabled services in tabs, menus, shortcuts, search results and notifications that would promote those services. Enforce access through direct links and backend requests as well.
- Keep existing role permissions: package availability does not give parents access to staff-only tools.
- Changing packages must preserve organisation, child, parent, staff, attendance, payment and communication data.
- Keep package names and prices configurable. Gold and Silver prices have not been supplied.

Organisation features versus community services

Gold retains the linked school or church's own workflows, including its events, lessons, documents and communication. Hiding the external Christian Kids Hub service must not disable the church's own administration or parent content. Likewise, the church's Events shortcut stays available when the community Kids Events & Places service is hidden.

Checks before release

- Verify each package in both parent and staff roles. Gold shows the main organisation and Clinics; Silver follows the saved toggles; Free includes all community services.
- Verify disabled direct links are blocked, organisation switching refreshes access, and existing check-in, messages and documents still work.
- Verify package changes update the app without deleting data or exposing another organisation's records.

Dashboard layout instructions

Parent app

- Keep the greeting, notification bell, child card and child selector from the supplied parent app.
- Below the child card, use a horizontally sliding service bar. Keep the selected school or church tab followed by services available under its package.
- Gold: linked organisation + Clinics. Silver: linked organisation + Clinics + admin-enabled services. Free: linked organisation + all community services.
- Keep Your favourites below the sliding bar. The church example uses Check-in, Lessons, Moments, Events, Prayer and Documents.
- Below favourites, retain four full-width pale cream cards stacked vertically: This Week's Verse, This Week's Lesson, Prayer Focus and Pastor's Devotion.
- Keep Home, Classes, Messages and Profile navigation. The page scrolls vertically; services scroll horizontally.

Staff app

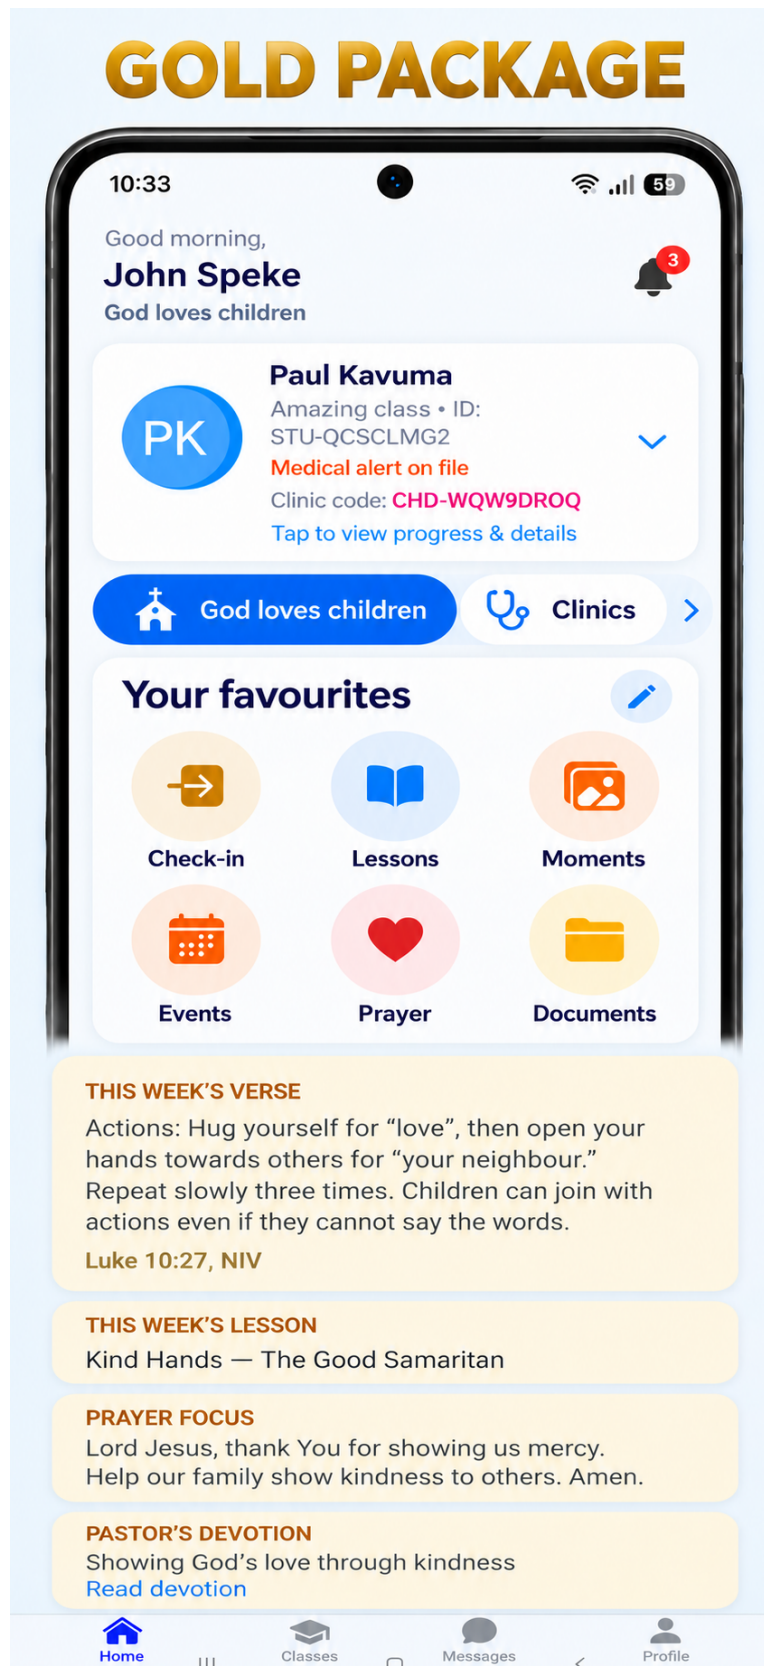

- Keep the greeting, notification bell, staff profile card and organisation identity from the updated staff screenshots.
- Place package services in the horizontal sliding bar beside the main organisation, above Your favourites. Gold shows only the organisation and Clinics. Silver shows the admin-selected services. Free includes all community services.
- Retain staff favourites, Today's Timetable, assignment and classwork cards, Latest Announcements, and Home, Character, Classes, Messages and Profile navigation.
- All school or church operational features remain subject to existing staff role permissions.

Mockup notes

The following pages show the latest three parent mockups and the revised three staff mockups. Silver is an example configuration. Names, dates, timetable entries and content are illustrative. Written access requirements take precedence over sample content.

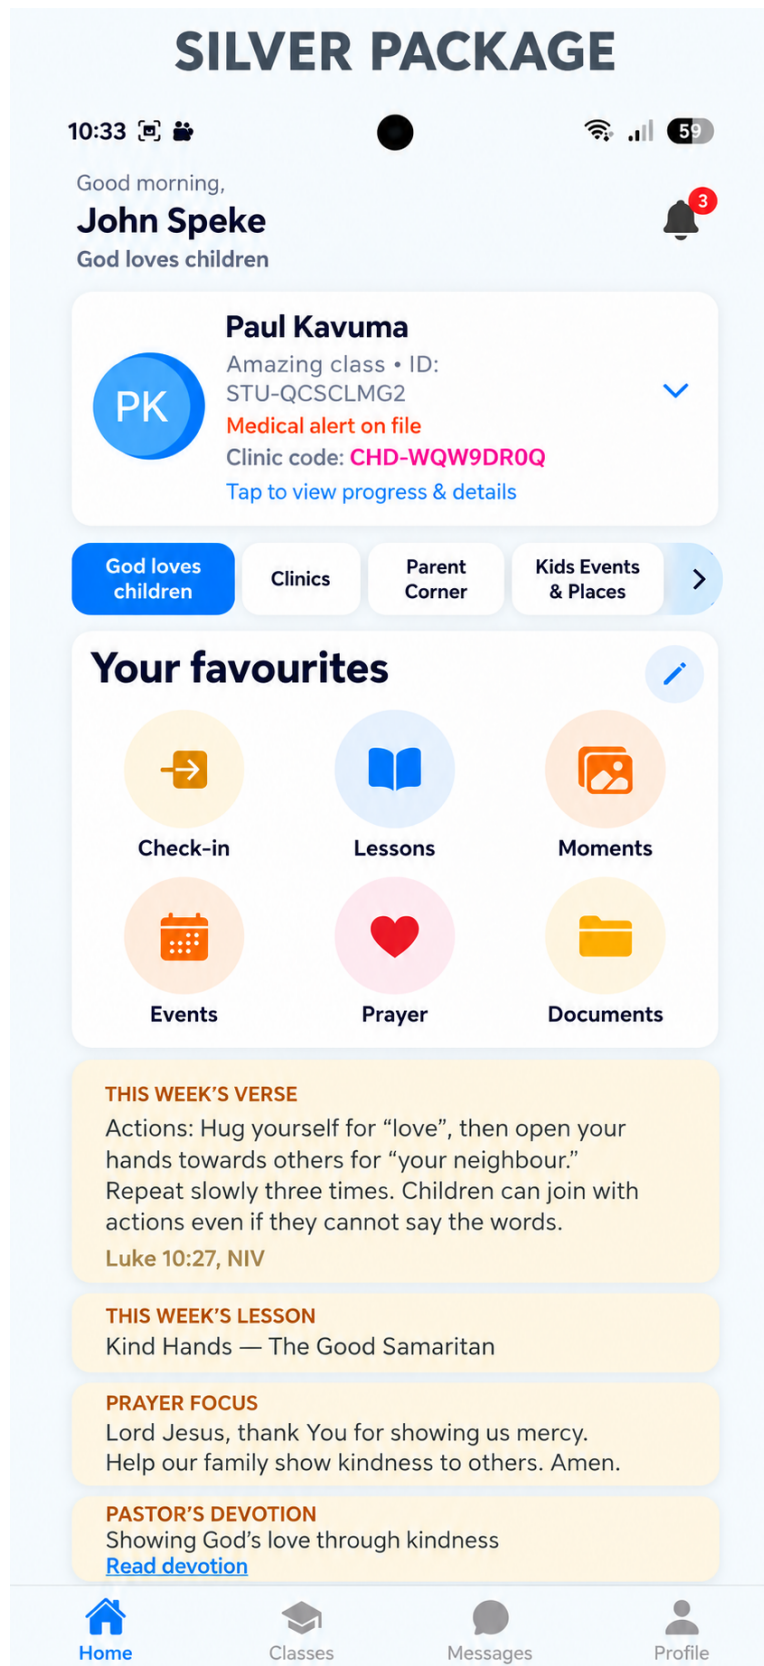

GOLD PACKAGE | Parent app

Linked organisation and Clinics.

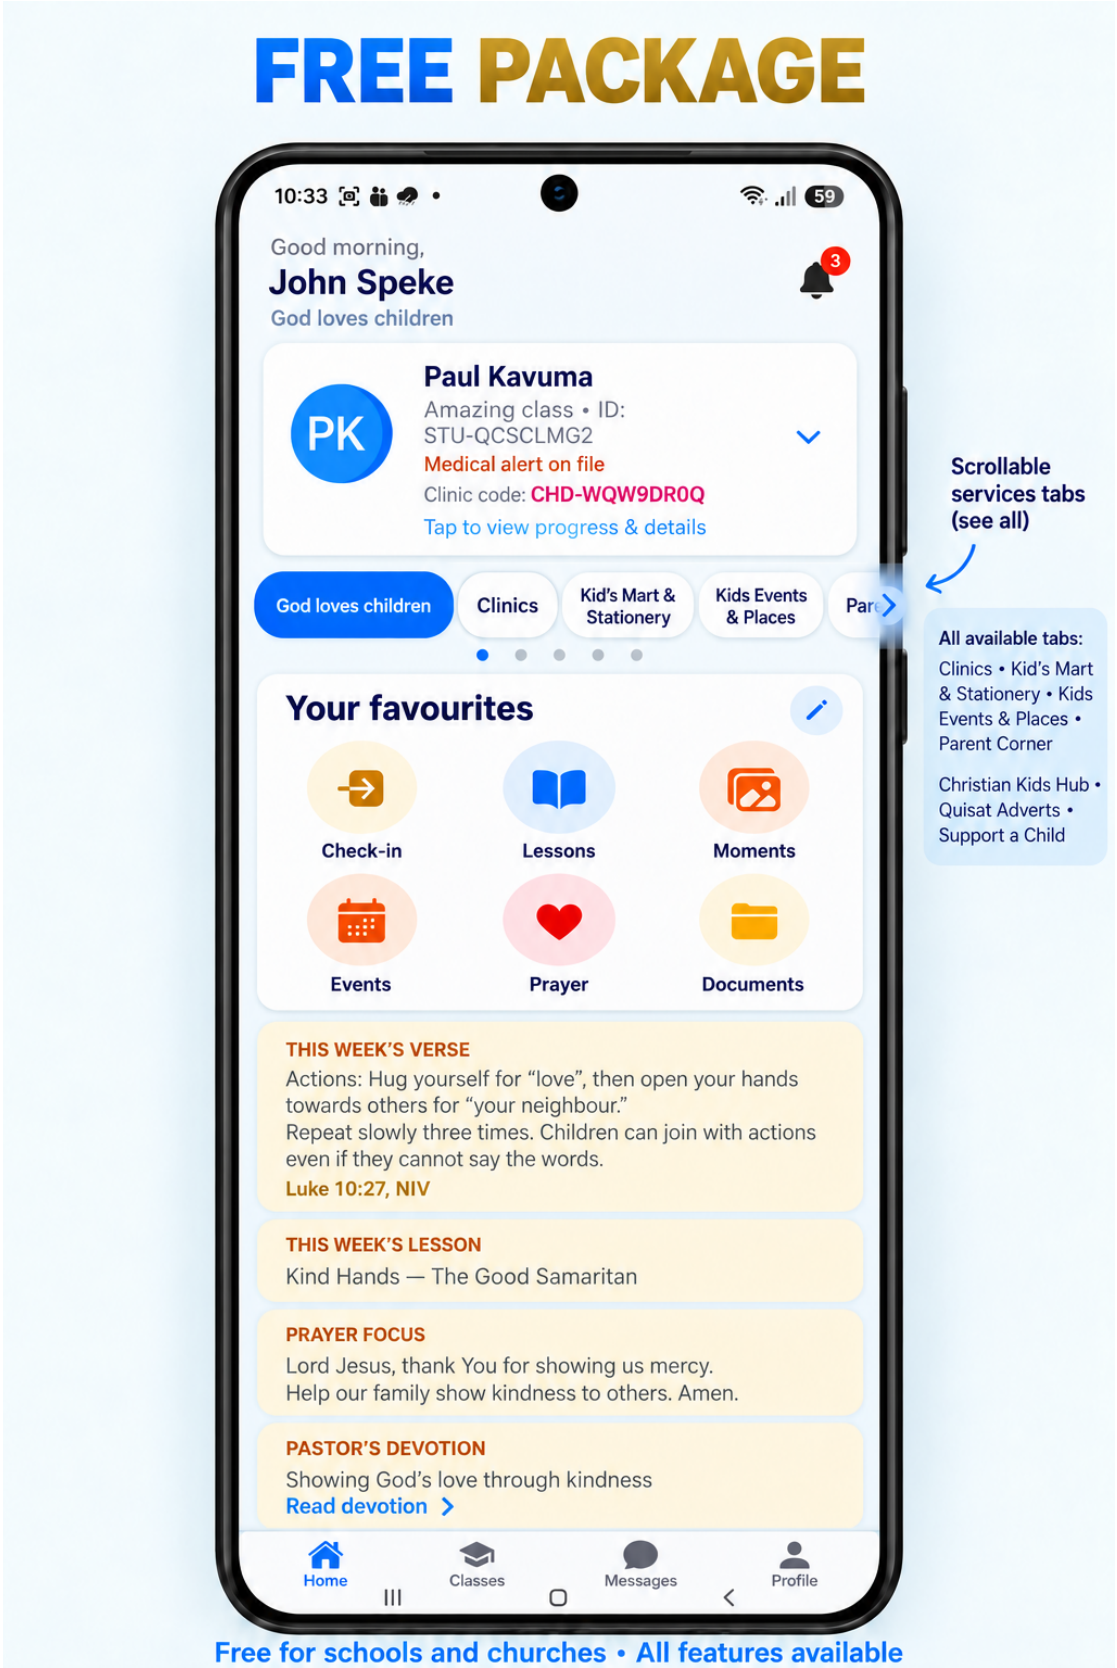

SILVER PACKAGE | Parent app

Example: Clinics, Parent Corner, Kids Events & Places.

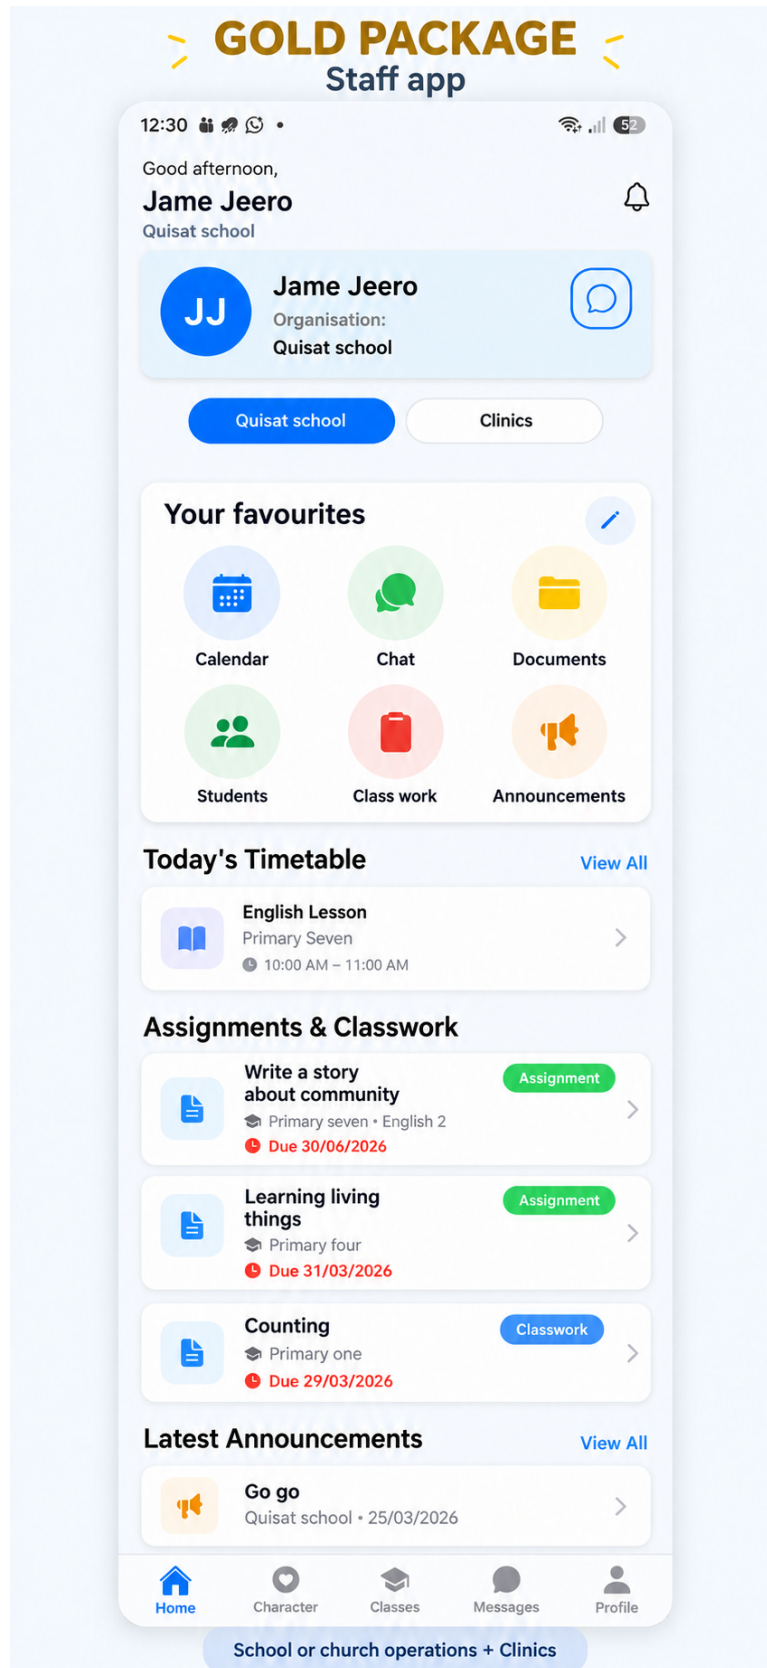

FREE PACKAGE | Parent app

All community services available through the sliding bar.

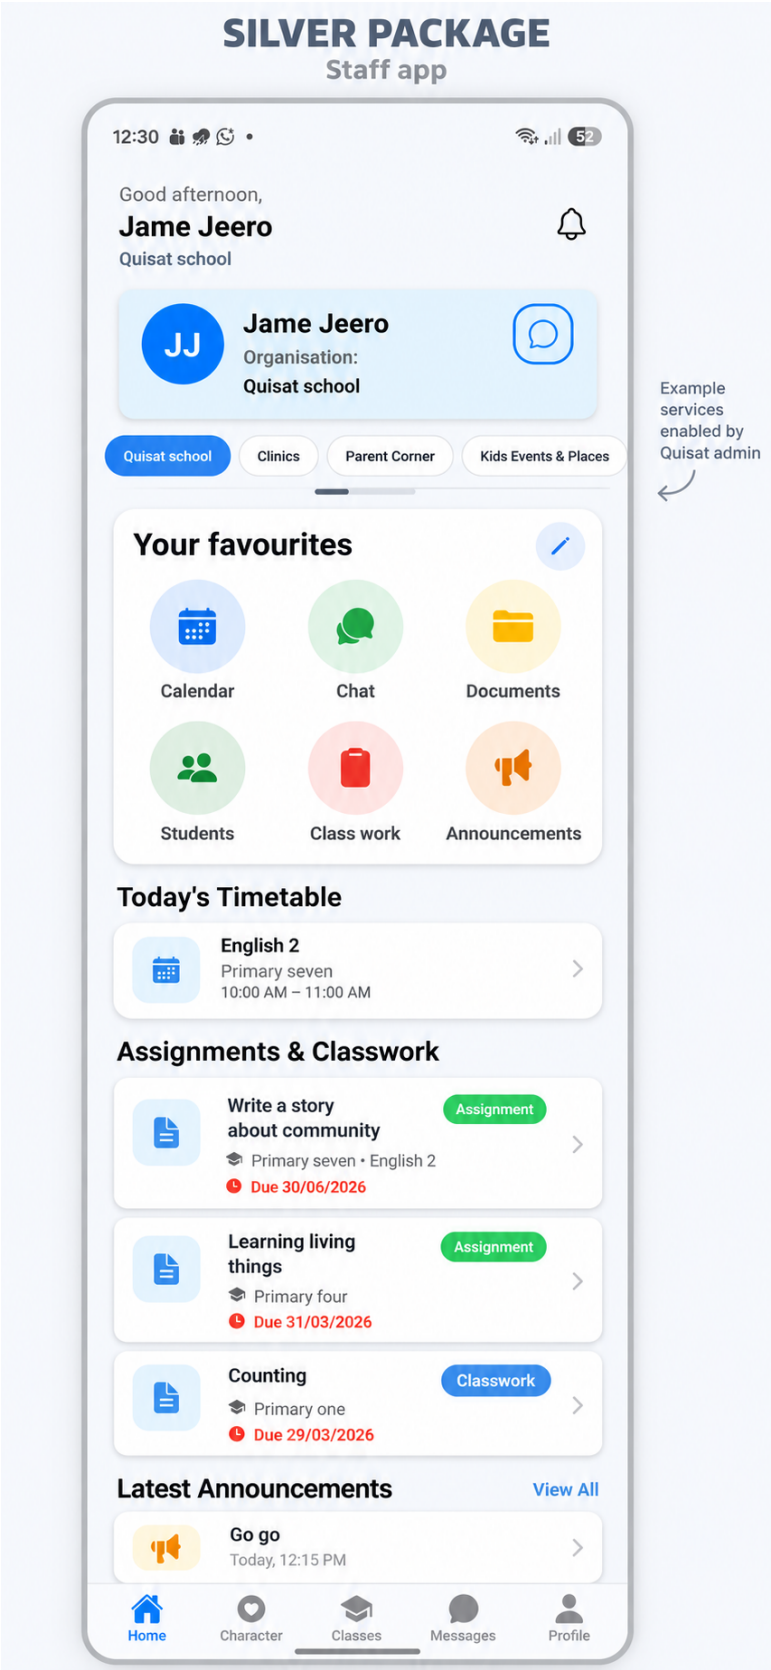

GOLD PACKAGE | Staff app

Revised staff dashboard with package services in the sliding bar.

SILVER PACKAGE | Staff app

Revised staff dashboard with package services in the sliding bar.

FREE PACKAGE | Staff app

Revised staff dashboard with package services in the sliding bar.
