

Post-login advertisement

Goal

After a successful sign-in, show an administrator-managed advertisement for 10 seconds, then automatically open the existing dashboard. Apply to parent and staff sign-in; keep authentication and role routing intact.

Required flow

1. Authenticate the user successfully.
2. Select an active, scheduled advert. If none is available, open the dashboard.
3. Start the 10-second countdown only when the advert is visible and ready.
4. Display "Your dashboard opens in 10 seconds."
5. On completion, navigate once to the correct dashboard and remove the advert from the back stack.

Branding and creative

Picfare is an example advertiser only. Use the selected advertiser's supplied logo without stretching or redrawing it. Advertiser name, logo and creative must be configurable; do not hard-code Picfare or display a powered-by partnership claim. Support an image or video creative; fit assets without clipping logos or essential text. Video must not extend the 10-second wait and should start muted.

Admin controls

Allow authorised administrators to upload and preview creatives, set advertiser name and optional destination link, activate/deactivate adverts, and set start/end dates with an explicit timezone. Show one advert per successful login; define a predictable rotation if multiple adverts are active.

Failure and timing rules

If fetching or loading fails, go directly to the dashboard. Use a short bounded loading timeout, never an indefinite spinner. Preserve login state. Background/resume must not restart the advert; use elapsed time and route immediately when the 10 seconds have expired. Refreshing the dashboard must not replay it.

Decision to confirm before implementation

The advert mockup shows no Skip button. Recommended improvement: allow Skip and bypass the advert when opening an urgent notification link. Treat this as an optional product decision; the agreed default remains a 10-second automatic transition.

Example advert - login flow

Visual concept: Picfare is an example advertiser only. All content is illustrative.
